

Total Purity Solutions

## Ocean Team Windcare as Experts in Servicing Fluid Carrying Systems and Components

### One-Stop-Shopping Service for Wind Turbines

Ocean Team Windcare offers a unique service package:

- Oil exchange in gearboxes and hydraulic systems
- Exchange, refilling, and filtering cooler liquids
- Rinsing or flushing systems (gear, hydraulic, coolers)
- Chemical or mechanical cleaning of fluid systems
- Grease replenish in bearings by new patented method
- Ultra sonic cleaning of parts and components
- Analysis of oil, grease, cooler liquids, etc.
- Workshop activities for OEMs and windfarm operators
- Optimizing and re-designing existing fluid system
- Technical consulting in liquids and fluid systems

### Ocean Team Windcare keeps your fluid carrying systems in great shape, extending life time and reducing risks of break downs. All optimizing your output.

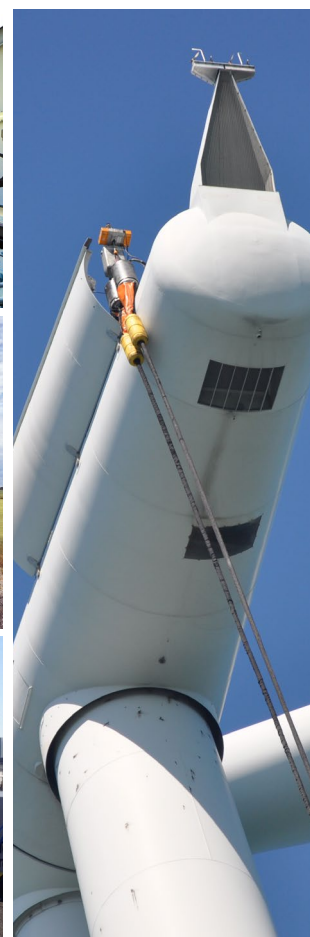

Our experienced wind team carry know-how, identify the best and most efficient cleaning methods for a quick and safe way to clean and refill your system. Saving you both time and money due to higher efficiency, longer system life, and reduced risks of breakdowns.

### Outcome of Services by Ocean Team Windcare

Your benefits of a proactive maintenance strategy are:

- Supporting lubrication of oil and grease
- Keeping flow rates in accordance with specifications
- Ensuring functions of valves, brakes, cylinders, etc.
- Lowered working temperatures reducing risks of fire
- Extending inhibitors' and additives' life time
- Keeping preservation for pipes and components etc.

All supporting longer life time and reduced costs for the complete system.

### Cost of Energy in Focus

Optimizing services, reducing standby time and extending the over all life time, supports the wind industrys efforts for reduced costs of energy!
