

**Total Purity Solutions**

## On-site Oil Analysis Program

- With a 24 Hour Emergency Service

**Ocean Team's On-site Oil Analysis Program makes it possible for you to get a quick and reliable picture of the health of your system.**

### Immediate Analysis Results

By use of our mobile analysis kit, we are able to both extracting and analyzing oil samples on the spot. Within short time our engineers are able to identify, what is causing trouble in your system, and what actions are to be made.

### Particle Identification and System Wear

Identification of the type of contamination in an oil sample can be of great help in diagnosing system wear. Our engineers are highly trained and qualified in particle identification, and can provide a full diagnosis, including advice and suggested action plan for system improvements.

### Our On-site Program Include:

Ocean Team's LubriCARE program is used within the area of:

- 24 hour emergency service
- Representative oil sample extraction according to ISO 4021 and ISO 3722 standards
- Electronic counting of particles according to ISO 4406.
- Analysis according to ISO 4407 by means of optical microscope.
- Analysis according to AS 4059 - US standard
- Analysis of oil and diesel for presence of micro organic and bacteria growth

**"We Fight The Invisible Enemy at Your Site"**

Did you know that harmful contaminants, which are critical for most hydraulic and lubrication systems, are far smaller than what can be seen with the naked eye – meaning that contamination is an invisible enemy?"
