

Technical datasheet

Torque Gun 3/4" 95-950 NM

OTS ID.: 9000-532

Introduction

The LION Gun is the world's first affordable precision bolting system with built-in data recording. Set your desired torque output on the LION Gun's display and pull the trigger to get precise, repeatable torque without excessive noise or vibration.

The LION Gun's industrial-strength gear box is driven by a brushless motor connected to a non-impacting gearbox to deliver torque faster, smoother and more reliably than manual clicker wrenches, impact wrenches and other tightening tools.

Through the use of aerospace-grade alloys, the LION Gun packs tremendous power without the weight. The 18-Volt lithium-ion battery provides long lasting operation with a quick recharge time to keep the job going.

Built-in data recording capability allows the user to maintain a log of all completed bolting jobs. For improved quality control and accountability, the information can be saved to a PC or tablet to provide a permanent record of the work performed.

Features

- Built-in data recording
- Battery driven
- Socket inserts to fit 1" and 1.1/2"
- One man operation

Safety features

- repeatable torque without excessive noise or vibration.
- tremendous power without the weight.

Capacity & performance

Min. Torque rating	95 Nm.
Max. Torque rating	950 Nm.
Battery capacity	2x 18V, 4Amp.

Weight & dimensions

Length	500 mm.
Width	400 mm.
Height	120 mm.
Gross Weight	8,5 Kg.
