

Technical datasheet

MPC Color, Kit and Patches

OTW ID 7000-161

Introduction

MPC Color allows real time on- site determination of present condition of your rotating equipment through the use of color range testing of solid surfaces and liquids. The technology has been customized to provide lubricant varnish potential testing, when used in combination with the MPC Patch or suitable laboratory equipment. Data results are captured and stored in text and audio captions for quick analysis. The MPC Color packs tremendous science into an unassuming, convenient and extremely accurate package. Shows results in 1.8 seconds.

Features

- On-site results
- Trend results
- Light weight handheld portable device
- Protective carrying case
- Store data for up to 350 samples

Safety features

- Stores up to 350 samples
- Great flexibility

Capacity & performance

Measuring Geometrics	45/0 Image Capture
Illuminate/Observer	D65/10 and A/10
Standards/Sample Storage	20//350
Measurement Time	1.8 seconds
Display	4.5cm Color TFT
Data Interface	USB
