Grease Replenish

Introduction

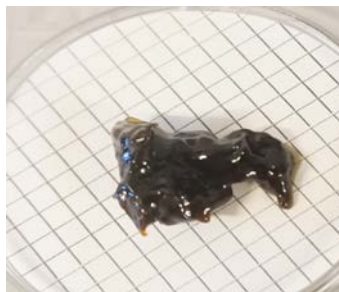

OTS item number.: 15628

Grease Replenish is a patented soluble that lowers the viscosity on grease.

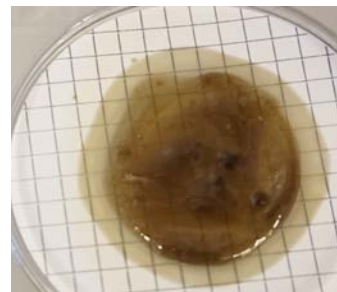

The solution is used to remove old, hardened and contaminated grease thoroughly before a refill of fresh grease promoting asset life.

Before solution

After solution

Capacity & performance

Physical state	Liquid
Odour	Not characteristic
Colour	Clear
Boiling temp/range (1013 hPa)	100°C

Weight & dimensions

Flash Point	No Data
Density (25°C)	1.14 ± 0.05 g/cm
PH Value (25°C)	6.00 ± 1.0
Water solubility(20°C)	100 WT%
