

Technical datasheet

OTW.JP5.67.SS316

Introduction

The Grundfoss JP5 pump is a silent single step jet pump driven by a 1 phased motor with thermal fuse protection.

The JP pump is a horizontal, self-priming, centrifugal pump for pumping clear water and other non-aggressive liquids.

The assembly is mounted on a solid foot to secure a good base for operation. Handle is mounted for easy transportation.

Pump housing and wheel is made of stainless steel SS316.

Pressure control with two setting:

- High pressure and low flow
- Low pressure and high flow (self-priming mode)

1" BSP 60° connectors.

OTW item number.: 7000117

Features

- Flow max 67 l/min
- Work pressure max 6 bar
- Lifting height max 48 mVs
- Suction lift max 8 meter

Safety features

- Build in thermal fuse
- IP 44
- ON/OFF switch located on side

Capacity & performance

Electrical features:	230 V, 50 Hz
Power consumption:	850W
Max/min liquid temperature:	+55/0 °C
Max ambient temperature:	+40 °C

Weight & dimensions

Length	364 mm
Width	206 mm
Height	306 mm
Gross weight	8,5 Kg
