

Total Purity Solutions

Customised Purification Solutions

Ideas, development, design, engineering & construction of individual customer solutions.

Ocean Team is the ideal partner for companies requesting custombuilt purification solutions. Thanks to our in-house design and manufacturing skills and professional network of external business associates and suppliers, we offer to handle the entire process from design through component purchase to assembly and onsite commissioning.

Well Thought-Out Equipment

We have many years of experience with developing our own purification units specially designed to solve complex cleaning tasks. Most of our systems are modular, compact and mobile, ensuring maximum flexibility, fast rig up/down times and superior usability.

We Meet Your Unique Specifications

We develop and manufacture equipment for both onshore and offshore industries. Due to our wide network of business partners, we are able to built purification units, which meet the unique specifications of the individual customer.

As a minimum we are capable of building equipment in accordance with following European regulations:

- EC Directive 2006/42/EC (Machinery Directive)
- EC Directive 97/23/EC (PED Directive)
- EC Directive 94/9/EC (ATEX Directive)

"Well Thought-out Equipment"

Modular, compact and mobile equipment, ensuring maximum flexibility, fast rig up/down and superior usability.
