

Technical datasheet

Kit for water analysis

Introduction

Analysis equipment for on-site analysis

- Photometer for measuring the content of Coolsafe 3171. Complete equipment in case including test tubes for 100 tests.
- Refractometer for measuring glycol content incl. pipettor
- PH-meter, temperature and conductivity meter with electrodes and pH-buffers in case

OTS item number.: 9000-

Features

ANALYSIS	TYPE	Laboratory Services	On-site Implementation	On-site Service	Annual System Documentation	Additional Services
CONTENT						
System Sample Analysis		○				
System Sample , incl. Conclusions		○				
Inhibitor dosing			○			
On-site Analysis			○	○		
Corrective Measures			○	○		
Corrective measures: Inhibitor Dosage				○		
Corrective measures: Glycol Dosage				○		
Corrective measures: Water Sampling for laboratory				○		
Extraction of Laboratory Sample with Conclusion					○	
Corrosion Rate Measurement, i.e. steel, copper,					○	
Part Stream Filtration						○
